

## Recent Trends in Nonlinear Partial Differential Equations II: Stationary Problems

Filesize: 4.3 MB

### ***Reviews***

*This publication is really gripping and fascinating. It is among the most amazing ebook i have study. I am just quickly could possibly get a satisfaction of looking at a written ebook.*

American Mathematical Society, United States, 2013. Paperback. Book Condition: New. 248 x 178 mm. Language: English . Brand New Book. This book is the second of two volumes that contain the proceedings of the Workshop on Nonlinear Partial Differential Equations, held from May 28-June 1, 2012, at the University of Perugia, Italy in honor of Patrizia Pucci s 60th birthday. The workshop brought together leading experts and researchers in nonlinear partial differential equations to promote research and to stimulate interactions among the participants. The workshop programme testified to the wide ranging influence of Patrizia Pucci on the field of nonlinear analysis and partial differential equations. In her own work, Patrizia Pucci has been a seminal influence in many important areas: the maximum principle, qualitative analysis of solutions to many classes of nonlinear PDEs (Kirchhoff problems, polyharmonic systems), mountain pass theorem in the critical case, critical exponents, variational identities, as well as various degenerate or singular phenomena in mathematical physics. This same breadth is reflected in the mathematical papers included in this volume. The companion volume ( Contemporary Mathematics, Volume 594 ) is devoted to evolution problems in nonlinear partial differential equations.
