Reviews

This pdf is indeed gripping and interesting. It is definitely simplistic but shocks within the 50 percent of your book. Once you begin to read the book, it is extremely difficult to leave it before concluding.

The object is the development of certain veins of argentiferous minerals, located in Churchill County, Nevada, in what is known as the Mountain Wells District. The value of these veins has been carefully examined and inquired into - a geologist having been sent from this city for that specific purpose. From his report, which is herewith appended, it will be seen that the claims have been wisely selected and offer every inducement as a basis for mining operations. At the time of the examination of the property it was the intention of those interested to style the Company, the Grey Eagle Silver Mining, but further inquiry developing the fact that the name had been appropriated, it was deemed advisable to change the same, which was accordingly done, and which will account for the use of the original title in the report of the examination. An attentive perusal of the accompanying report and certificate of assay of rock from the Grey Eagle lode, is respectfully invited. The Company have commenced a vigorous development of their property, under the management of thoroughly competent and practical mining men, and they expect, before many months, to secure such results from their operations as will convince all of the undoubted richness and value of the lodes owned by the Nevada Silver Mining Company.
