Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 edition. Excerpt: .inches, May, 1882; 4.25 inches, November 17, 1906; 4.08 inches, September, 1898; 4.07 inches, October 11-12, 1901; and 3.93 inches, Februar, 1882. There were nineteen times when 2-L-hour rainfalls of between three and four inches occurred. During the eleven years 1895-1906, inclusive, there have been twenty-six times when rainfalls between two and three inches have occurred. These excessive amounts are not confined to any particular month or season, but occur in every calendar month. One of the heaviest rainfalls in one hour was 1.82 inches, in Febru, 1888. Letters of the alphabet following the name of the station or in column indicate the number of days missing from 1month s report. thus: (a), one day; (b), two days; etc. o1 11.-All records are used in determining State means, but the mean departures from normal temperature and precipitation are based only on records from stations...
